Product	Description:	Service note no.
SCF pedal	Overload diode always slightly on	713 10 1773

Problem:

SCF, Overload diode always slightly on

Solution:

The overload LED was slightly on all the time.
To stop this, a 20kOhm resistor is mounted between IC6 pin1 and LD2 anode.

Implemented from S/N: 38000 (110V versions) / 105926 (230V versions).
