List of changes from v. 3.03 to 3.20 Release date Jan. 15. 2003

- Preset Upload/Download to PC
- PC screen resolution down to 800x600 now supported
- Improved Icon performance

It is now possible at the MAC/PC Icon editor to select between 3 different views: Full screen with all six virtual faders available (only at 768x1024 resolution), full screen with one fader at the right side of the display (for 600x800 and 768x1024 resolutions), or no faders for monitor only purposes when running with an Icon (all resolutions).
