<b>FireworX</b>	<b>Modification for Fast Ex. RAM PC12902-3</b>	<b>720 10 T029</b>

### **IMPORTANT:**

Modification should only be carried out by authorized technicians.

This modification is ONLY for the type FAST Ex. RAM board, PC12902-3.

Do NOT make the modification on board version PC12902-10 !!

### **Symptoms:**

The FireworX freezes intermittently or at power on. Or it makes noise.

### **Procedure:**

Locate the Fast Ex. RAM board PC12902-3:

1. Mount a resistor type 4K7 5% as shown at the figure below.  
Make sure to solder the resistor to the correct pins on the connector.
