

Product	<h1>Sound Check</h1>	22-01-2004
Power-Core		Ref.THSIG

Sound check with waveLab:

1. After starting the PCFW and detecting it successfully start the waveLab program.
2. Insert any audio file for reference.
3. Insert effects to the wave file using the VST-TC MegaReverb.
4. Try to notice any crackling or other noise problems.
5. Load the device for max DSP use by insterting MegaReverb 8 times.
