Title 1378 - (ATR42) PLAY LOUD				Module title MODULE TITLE	
Number P22681		Revision C	Variant A	Version A	Board type UIBOARD
Date 26/07/2016:17:24		Filename p22677-B		Page / of 1 / 2	

NOTE: D+5V is actually now 4V.  
 If it ever is changed back to 5V, the max. voltage from this pot will then be about 4V.  
 This would exceed the rail of the micro (3.3V) that is measuring this.
