

Service Note		
Product	Description:	Service note no.
VoiceTone Correct XT	Factory reset, UI test and Pot calib.	SNo-T0144

Reason for note:

Advice how to make a factory reset together with an UI test and Pot re-calibration.

Actions:

- Factory Reset: Hold down “**Warmth**”, “**Adaptive**” and “**Display**” on power up
- UI Test/Display Build: Hold Down “**Adaptive**” and “**Display**” on power up
- Pot re-calibration: Hold down Right footswitch and “**Warmth**” on power up

If you need some hints for the Pot re-calibration you can possible get some by viewing how to re-calibrate a Voice Tone Synth. Please look at the Voice Tone Synth page.
