

Service Note		
Product	Description:	Service note no.
VoiceTone Harmony G-XT	Factory reset, UI test and Pot calib.	SNo-T0142

Reason for note:

Advice how to make a factory reset together with an UI test and Pot re-calibration.

Actions:

- Factory Reset: Hold down “**Manual**”, “**FX**” and “**Voice 2**” on power up
- UI Test/Display Build: Hold down “**Voice 1**” and “**Voice 2**” on power up
- Pot re-calibration: Hold down Right footswitch and “**Manual**” on power up

If you need some hints for the Pot re-calibration you can possible get some by viewing how to re-calibrate a Voice Tone Synth. Please look at the Voice Tone Synth page.
