

Instructions on how to replace the fan on IPD1200

1. Disconnect the fan and then pull it gently, the fan is attached by two foam stickers to the chassi

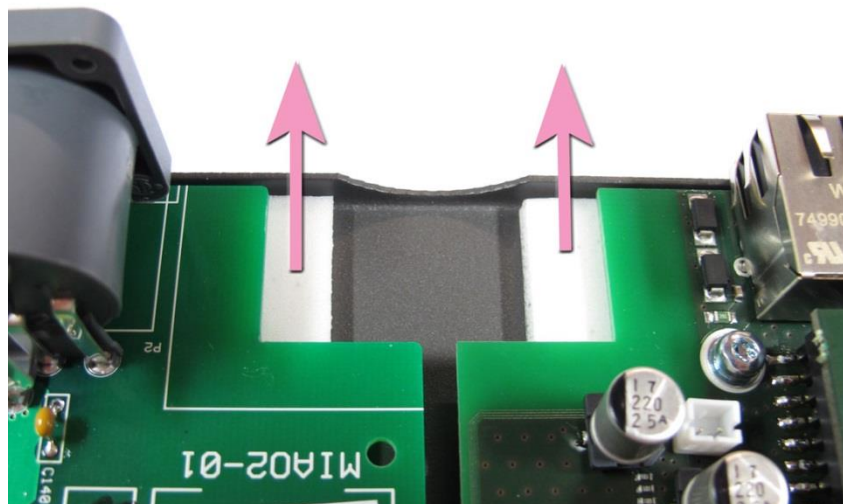

2. After you removed the fan you might see that most of the foam sticker is still attached to the chassie.

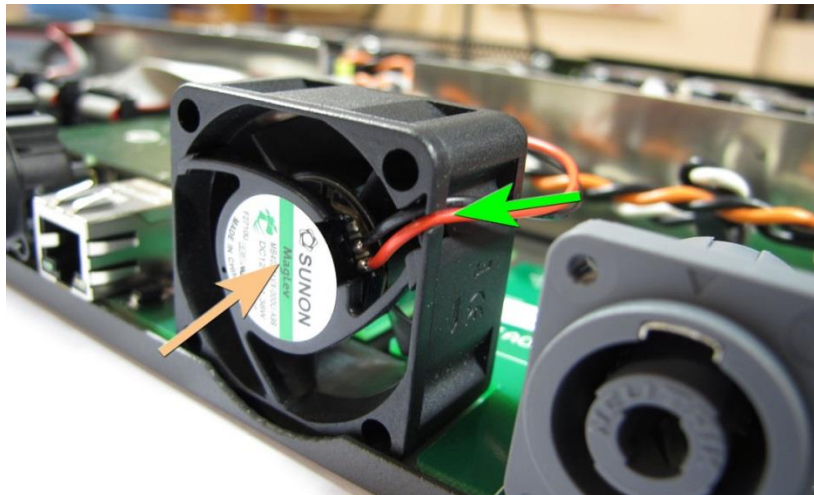

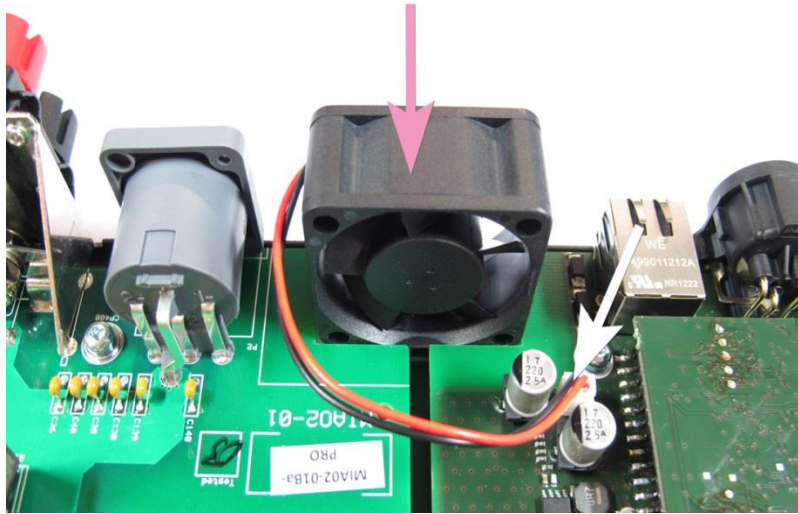

3. You must remove the foam sticker complete so the new one can be correct attached

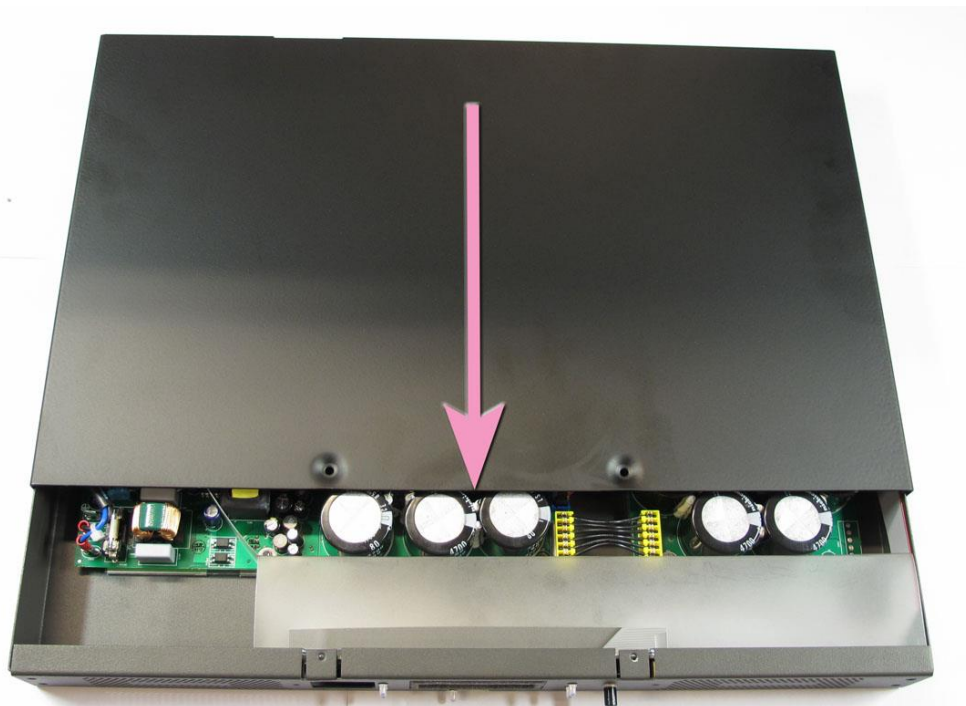

4. Remove one of the protective sheet and mount them according to the picture below
Then remove the protective sheets from the top off the foam sticker

- 5 Place the fan on the adhesive foam stickers and press down (pink arrow). Make sure that the sticker of the fan is placed in the direction that the orange arrow shows with the fan-cables on the side of the fan according to the green arrow. Mount the connector on the mounting header according to white arrow. Make sure that fan-cable is not stuck in the fan.

6. Slide in the cover from the rear towards the front.
