1.0	Initial Release	09/21/2016

Mode 1 – Ignore MIDI CC

Power up while holding down the SET button will cause the unit to ignore all incoming MIDI control change messages.
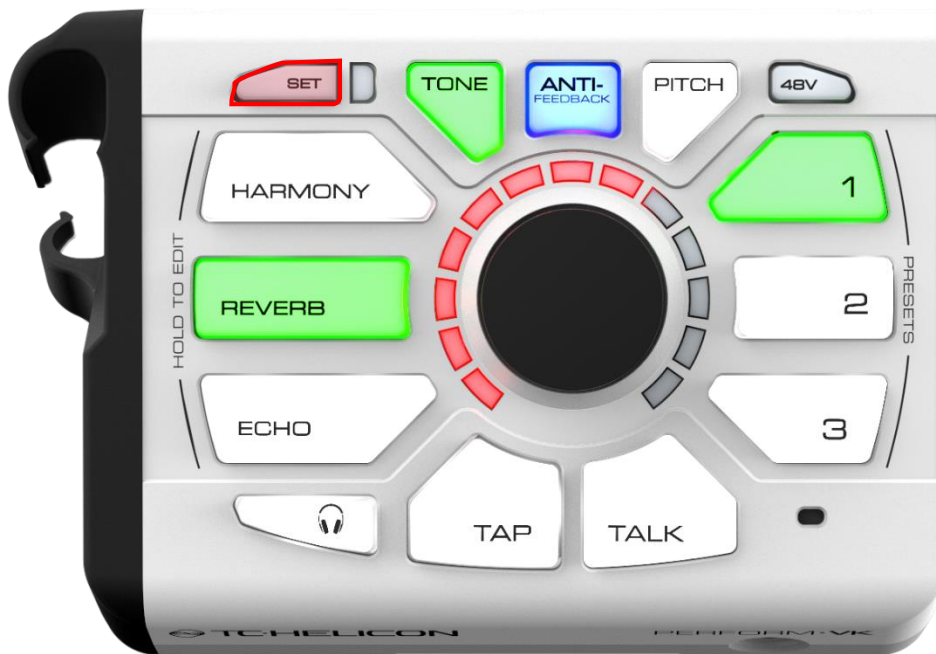

Mode 2 – Factory Reset

Power up while holding down HARMONY and ECHO to restore factory default settings.

Mode 3 – Boot to Safe Mode

Power up while holding down SET and HEADPHONES to boot into Safe Mode. In this state, the unit will not boot the DSP, and will wait to receive MIDI SysEx commands over USB via MIDI-OX or a similar serial-MIDI terminal.
