1. INTRODUCTION

Thank you for purchasing this Tannoy Ceiling Monitor System product. This product range is suited for music and speech reinforcement applications requiring exceptional sonic quality with uncompromised reliability.

2. UNPACKING

Every Tannoy product and accessory is carefully inspected before packing. After unpacking, please inspect your product to make sure no damage has occurred in transit. In the unlikely event of any damage, would you please notify your dealer immediately and retain your shipping carton, as your dealer may ask you to return the faulty unit to him for inspection.

Each CMS loudspeaker is packed in pairs and provided with the following accessories as standard; C Ring, tile-bridge kit and cut-out template. A plaster (mud) ring is also available as an optional extra.

3. SAFETY NOTICES

Some regional construction codes require the use of a secondary method of securing loudspeakers in ceiling to provide security of a back up support. A secondary support line should be attached from the safety loop on the rear of the product to a source point on the ceiling. Please consult the relevant construction codes in your region.

When using a power driver to install the product it is essential to use the correct torque level settings to avoid over tightening and damage to the ceiling material or clamps.

Recommended torque setting: 1.5Nm

Tannoy will not be held responsible for any damages caused by the improper installation of these loudspeakers.

SAFETY NOTE:

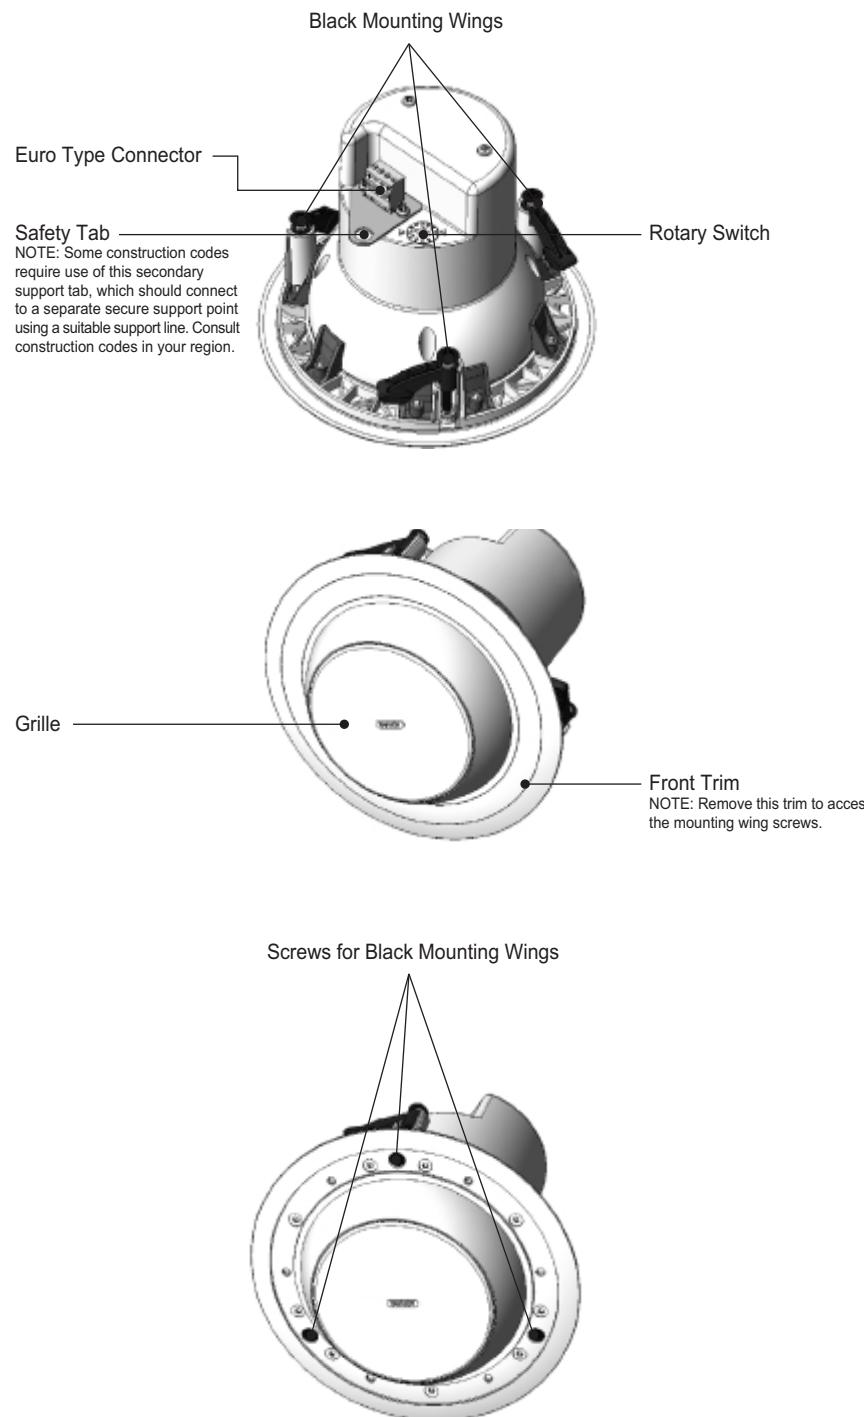

In order to comply with relevant fire safety regulations (i.e. BS 5839:1998), it is required that in the event of fire, that failure of the circuit to which the loudspeaker is connected does not occur before evacuation of the building is complete. Suitable measures include: -

- a) use of terminal blocks (for connection to primary) with a melting point of not less than 650°C, for example constructed from ceramic materials;*
- c) use of terminal blocks of a lower melting point but protected with thermal insulation;*
- d) use of terminal blocks such that, on melting, an open-circuit or a short-circuit does not occur.*

4. ALTERNATIVE INSTALLATION APPLICATIONS

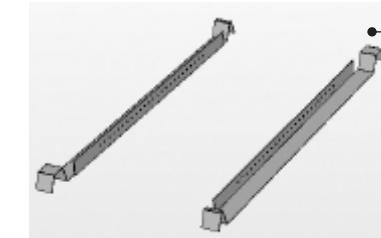

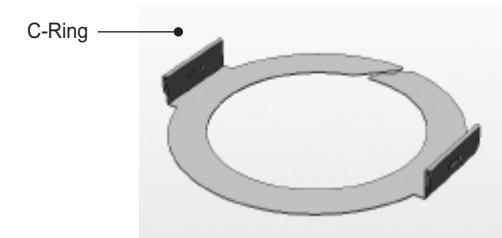

The Tannoy CMS401 DCe and CMS401e speakers are primarily designed for in-ceiling applications. However, the versatile design allows for installation into other applications such as boardroom tables and museum display kiosks. The thickness of the installation surface must be between 1mm and 20mm. It is your responsibility to ensure that the installation surface is strong enough to support the weight of the speaker. Please contact Tannoy customer services if you require further advice.

5. PRODUCT FEATURE IDENTIFICATION:

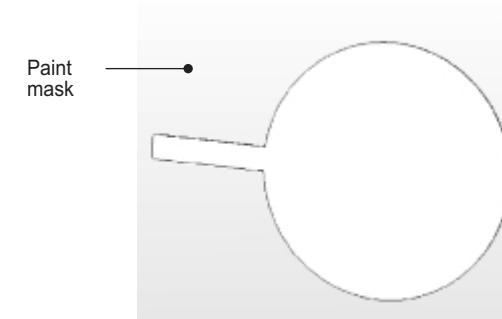

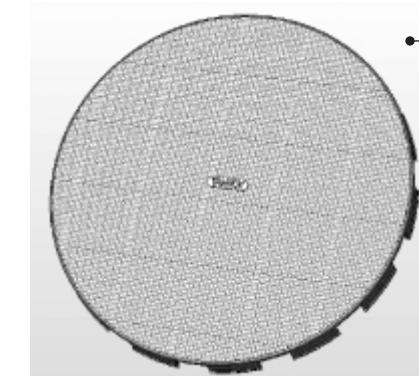

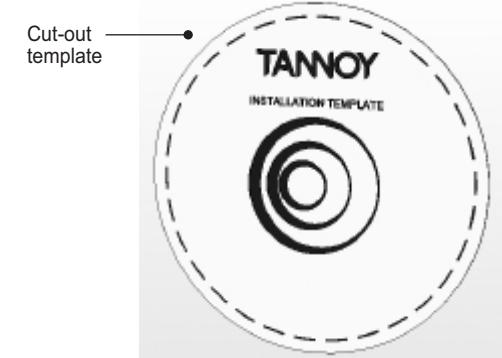

6. ACCESSORIES:

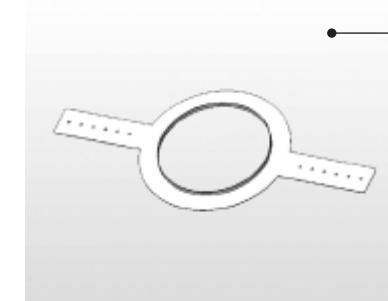

Standard Accessories

Note: A tile bridge kit must always be used when installing into suspended ceiling tiles

Optional Accessories

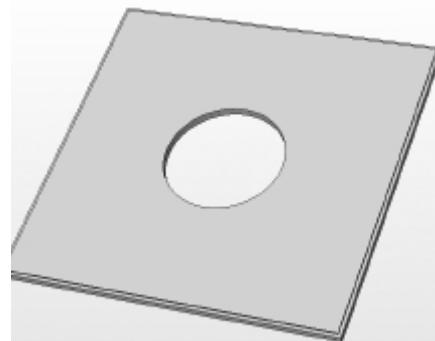

7.1 MECHANICAL INSTALLATION GUIDE FOR SUSPENDED CEILINGS

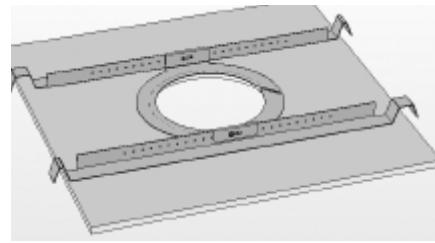

- 1** Remove the ceiling tile from its frame and place it on a flat surface. Mark the cut-out area on the ceiling tile by tracing around the template provided.

- 2** Cut out the hole in the ceiling tile using a circular saw or pad saw.

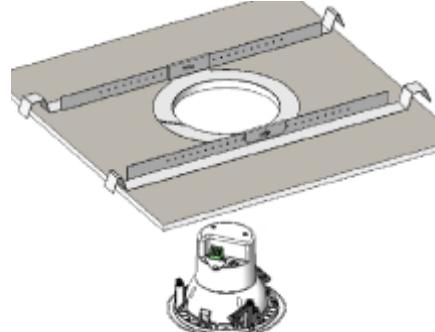

- 3** Place the C-ring and tile-bridge on top of the ceiling panel, aligning the C-ring over the hole, and screw the C-ring to the tile bridge using the fixings provided.

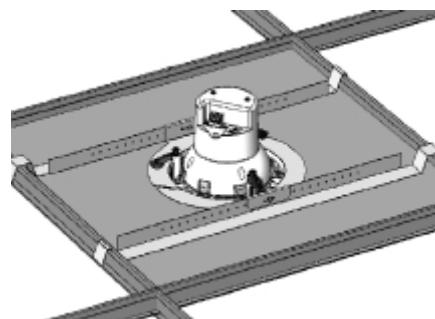

- 4** Slide the speaker assembly through the hole and turn the screws on the front of the speaker to extend the black mounting wings. Tighten the screws until a firm grip is achieved.

DO NOT OVERTIGHTEN!

- 5** Slide the tile panel back into the suspended ceiling. The tile bridge ends will catch over the railings, supporting the weight of the speaker.

- 6** Swivel the speaker to point in the desired direction.

Tighten the black mounting wing screws until a firm grip is achieved. If using a power driver, Tannoy recommends a torque setting of 1.5Nm.

DO NOT OVERTIGHTEN!

NOTE: When the screws are tightened the speaker will lock into position.

7.2 MECHANICAL INSTALLATION GUIDE FOR SHEET-ROCK (PLASTER BOARD) CEILINGS

- 1** Mark the cut-out area on the ceiling by tracing around the template provided.

- 2** Cut out the hole in the ceiling using a circular saw or pad saw, then slide the C-ring into the ceiling, aligning it over the cut-out hole.

- 3** Go to section 6 for wiring and set-up instructions then return to point 4 below.

- 4** Slide the speaker assembly through the hole then swivel the speaker to point in the desired direction.

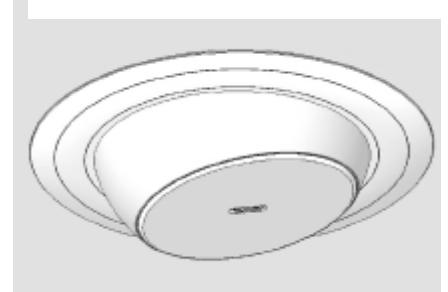

Tighten the black mounting wing screws until a firm grip is achieved. If using a power driver, Tannoy recommends a torque setting of 1.5Nm.

DO NOT OVERTIGHTEN!

NOTE: When the screws are tightened the speaker will lock into position.

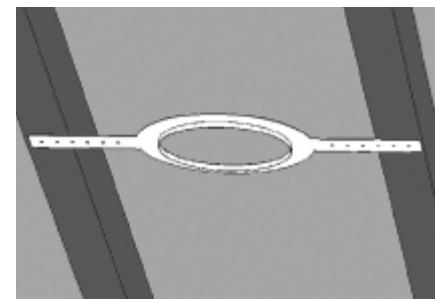

- 5** Replace the front trim to conceal the mounting wing screws.

7.3 MECHANICAL INSTALLATION INSTRUCTIONS FOR OPTIONAL PLASTER RING:

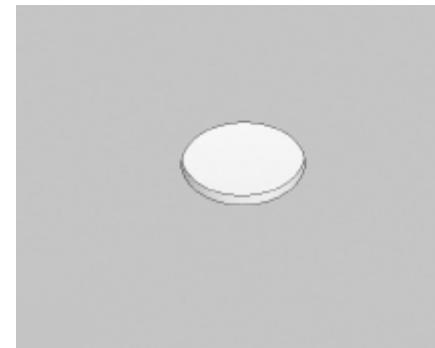

An optional plaster (mud) ring bracket is available from Tannoy. This bracket is designed to be pre-installed into newly constructed, non-suspended ceilings.

- 1** Nail or screw the plaster ring to the joists.

- 2** Lay the speaker wiring to where the speaker will be fitted and complete the plastering work on the ceiling.

- 3** Cut out the hole in the ceiling using a circular saw or pad saw.

- 4** Go to section 6 for instructions on wiring then return to point 5 below.

- 5** Slide the speaker assembly through the hole then swivel the speaker to point in the desired direction.

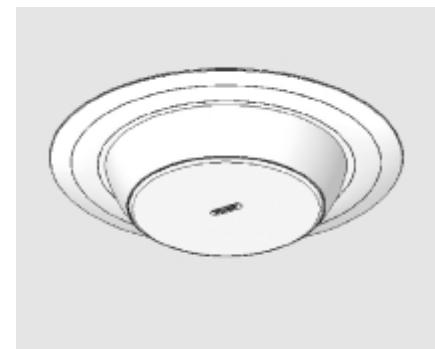

Tighten the black mounting wing screws until a firm grip is achieved. If using a power driver, Tannoy recommends a torque setting of 1.5Nm.

DO NOT OVERTIGHTEN!

NOTE: When the screws are tightened the speaker will lock into position.

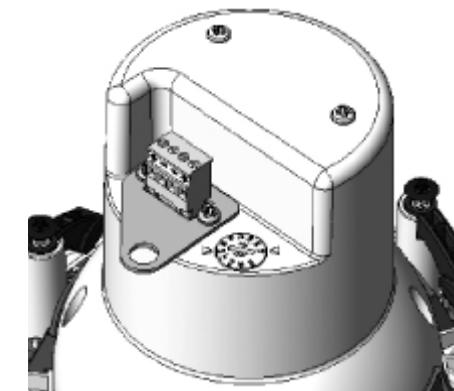

- 6** Insert grille by pushing it onto the speaker.

8. WIRING AND SETTING UP:

- 1** Locate the euro socket at the back of the product.

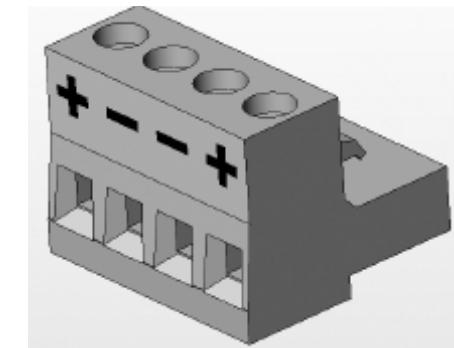

- 2** For connection to an amplifier, use pins 1 and 2:

- Pin 1 is positive
- Pin 2 is negative

For connection to additional speakers in a distributed line, pins 3 and 4 are in parallel where:

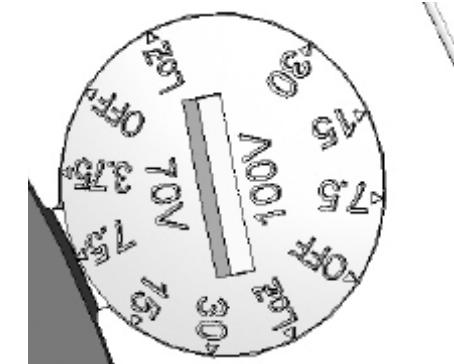

- Pin 3 is negative
- Pin 4 is positive

- 3** Use the rotary switch located on the front of the unit to select whether you wish to use the speaker in a low-impedance or distributed-line application.

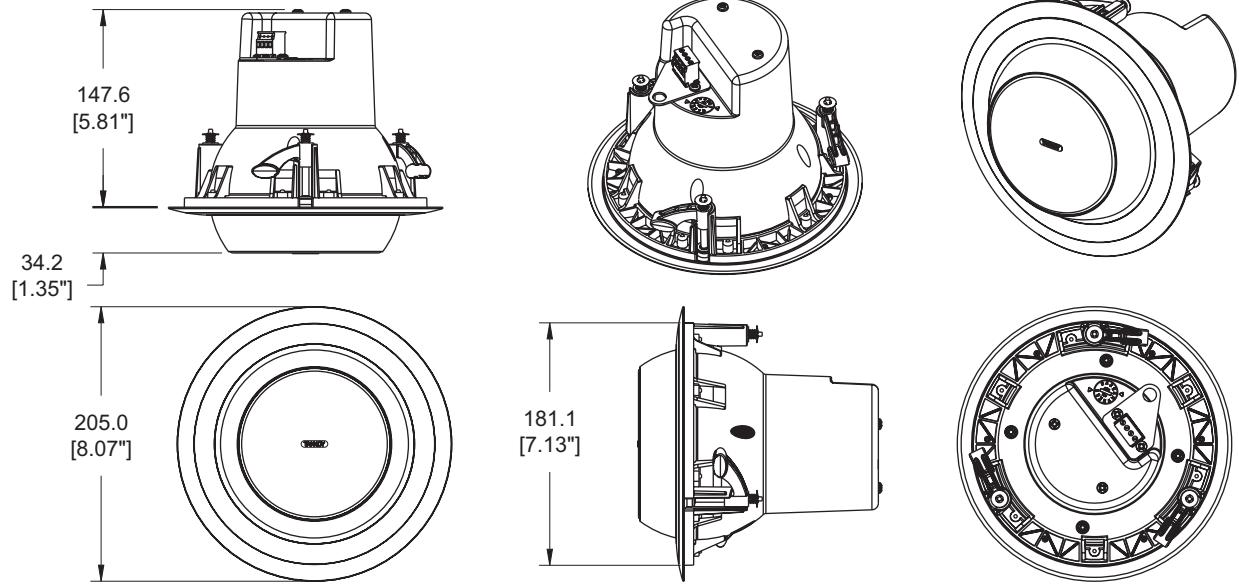

THE SPEAKER IS SUPPLIED IN LOW IMPEDANCE MODE. NEVER CONNECT THE SPEAKER TO A 70/100 VOLT AMPLIFIER WHILE IT IS SET FOR LOW IMPEDANCE.

All CMS401e and CMS401 DCe models use a 30W transformer. When using distributed-line systems, the transformer can be tapped at 30W, 15W and 7.5W, with an additional 3.75W tapping for 70.7V line systems.

Included Accessories	C Ring, tile bridge, paint mask, cutout template, grille	C Ring, tile bridge, paint mask, cutout template, grille	
Optional Accessories	Plaster (mud) ring	Plaster (mud) ring	

11. PAINTING

If desired, the grille and baffle panel may be painted to match the surrounding décor.

Painting the baffle:

- ◎ Carefully mask off the driver assembly using the paint-mask provided to ensure that the paint does not come into contact with the cone and roll surround.

Painting the grille:

- ◎ Carefully remove the acoustically transparent foam from the reverse side of the grille.
- ◎ Paint the grille and then replace the foam.
- ◎ Re-bond the foam to the grille over the entire area using a light spray-adhesive to avoid audible resonances.

Painting the trim:

- ◎ The speaker must be aimed before painting.
- ◎ The rubber trim should be left in place while painting.
- ◎ Apply a vinyl emulsion to the trim.

12. WARRANTY

No maintenance of the CMS loudspeaker is necessary.

All Tannoy professional loudspeaker products are covered by a 5 year warranty from the date of manufacture subject to the absence of misuse, overload or accidental damage. Claims will not be considered if the serial number has been altered or removed. Work under warranty should only be carried out by a Tannoy Professional dealer or service agent. This warranty in no way affects your statutory rights. For further information please contact your dealer or distributor in your country. If you cannot locate your distributor please contact Customer Services, Tannoy Ltd at the address given below.

13. DECLARATION OF CONFORMITY:

The following apparatus is/are manufactured in China for Tannoy Ltd of Rosehall Industrial estate, Coatbridge, Scotland, ML5 4TF and conform(s) to the protection requirements of the European Electromagnetic Compatibility Standards and Directives relevant to Domestic Electrical Equipment. The apparatus is designed and constructed such that electromagnetic disturbances generated do not exceed levels allowing radio and telecommunications equipment and other apparatus to operate as intended, and, the apparatus has an adequate level of intrinsic immunity to electromagnetic disturbance to enable operation as specified and intended. This equipment conforms to the requirements of the EMC Directive 89/336/EEC, amended by 92/31/EEC and the requirements of the Low Voltage Directive 73/23/EEC, amended by 93/68/EEC.
